15th Annual
Science Fair Plans Complete

By Bill Mickle
Plans are being completed for the 15th Annual Science and Engineering Fair, Friday and Sat-urday, March 21 and 22, at Northeastern A&M. It is expected that over 150 students will participate in the fair, which will be held in the gymnasium and main building. The fair will feature student projects in the fields of science, engineering, and mathematics. Awards will be given for the best projects in each category. Attendees are encouraged to come and see the latest scientific advancements by our students.

Juco Transfer Pre-Enrollment Held at KSCP

Juco college transfer students are being invited to participate in the 15th Annual Science and Engineering Fair, Friday and Saturday, March 21 and 22, at Northeastern A&M. It is expected that over 150 students will participate in the fair, which will be held in the gymnasium and main building. The fair will feature student projects in the fields of science, engineering, and mathematics. Awards will be given for the best projects in each category. Attendees are encouraged to come and see the latest scientific advancements by our students.

PACKING UP — Three of the many Northeastern A&M students packing their belongings for the upcoming spring vacation, which begins Thursday, are, from left: Christy Hammons, Tulsa; Nury Larsen, Tulsa; and Abbey Lawery, Coveta.

"Caribbean Series" Opens in NEO Fine Arts Gallery

The "Caribbean Series" traveling art exhibition will open in the gallery of the Northeastern A&M Fine Arts Building on March 3 and will remain open until March 31, with a party for spring break between March 9 and 17. The Caribbean paintings depict various scenes of Puerto Rico, St. John, St. Thomas and Jamaica. The works include landscapes, seascapes, and mountainous scenes. Caribbean series is a part of the NEA Fine Arts Series, which is part of the New York Times and Time magazine.

The paintings in the show are for sale at prices ranging from $75 to $850, according to Mrs. Kathy Page, director of the exhibition. During its stay at NEO, anyone interested in purchasing one of the paintings should contact Mrs. Page at (405) 964-9630. The show is being circulated around the nation by the Old Brown Art Guild of New York, N.J.

BULLETIN BOARD

Approximately 15 Northeastern A&M students and faculty members boarded two chartered buses behind Center Student Union around 6 a.m. this morning, and left on the spring break trip to New York and Washington, D.C. The Northeastern A&M students and faculty members are part of the 15th Annual Science and Engineering Fair, which will be held March 21 and 22, at Northeastern A&M. It is expected that over 150 students will participate in the fair, which will be held in the gymnasium and main building. The fair will feature student projects in the fields of science, engineering, and mathematics. Awards will be given for the best projects in each category. Attendees are encouraged to come and see the latest scientific advancements by our students.

The group should have arrived New York Friday, March 14, to return to Miami Sunday.

The Norse Wind staff will be conducting an accuracy check on articles published in the following issues. The purpose of the check is to invite readers to participate in the accuracy of the story. The questionnaires will be sent to individual newsmakers, and upon completion should be returned to the Norse Wind office, room 116, Shipley Hall.

Don't Waste Your Life

A human life is a terrible thing to waste.

It's really a shame to look at the number of people who don't care about life or, themselves, for that matter. Some people go through high school for appearance sake, then maybe they turn in two years of junior college for the same reason. But, what happens after that? Nothing. Edith Zero.

If the desire is there which sometimes it isn't, the two-year junior college graduate may embark into society and possibly find a good job. This, however, is highly unlikely. To quote the old television commercial slogan, "To get a good job, you need a good education." And two years of junior college just won't get it. Unless a person is enrolled in a two-year vocational program with the promise of help in finding a job, the chances of finding a good, well-paying job, are still slim without a college degree on his side.

Of course there are plenty of factory jobs around. But, who wants to work in one hundred degree heat in mid-winter, as well as summer; and, who wants to have a job where the machines they work with are more often than not faulty, therefore endangering the workers; and, who wants to ruin their lungs and general health by working under such bad that the carbon and smoke level (Goodrich, for example) drives the employees to wear respirators. Besides, some of those factories out there pay only two dollars an hour for back-breaking work. Is this the type of job you want?

What I'm trying to say is, if you want a good wholesome, job that pays well and has good employee benefits, don't stop your college career after two years. Go on to a four-year college, try for a Masters Degree, a Doctorate, or whatever but don't quit before you've even had a chance to start.

There will be hard times, times when you're depressed, when nothing seems to be going right and the only seemingly logical thing to do is quit, give up and go home. But, don't do it! The depression will pass and the future will see brighter, especially when the thought of a good job and a happy life just happen to cross your mind.

So remember, college education is of the utmost importance in today's world and, also, a "human life is a terrible thing to waste."

Sports Reputations

NED has a fantastic reputation in sports, or should I say in foot ball and basketball? We constantly have a winning basketball team and our football team is perennially in contention for the national championship.

What about the rest of our athletic programs? We recently have a girls basketball team that is activity pursuing a bid to the national basketball tournament with a chance to be national champions. We have a soccer team that always represents NED very well. We have a baseball team that has made significant progress in the last couple of years. We also have a track team.

I recently attended a track meeting with enough talent attending to have a potential championship team. The question is why don't these teams go on to the recognition they deserve? Why is the student body oriented toward football and boys' basketball that they never voice what is happening. Why did the girls' basketball team have to go the entire season undefeated before the majority of the student body realized that they even had a team? This explains how it can be done. Each team should get as much acclaim that they deserve at least that much.

Letters

Parking Difficult Along Curb

Why is there a high curb in the parking spaces to the north of Cunningham Hall and in front of chapel Hall? Are these parking spaces supposed to be used or not?

You can imagine what happens to a car's wheel alignment when the front wheels move in contact with the high curb to back out over the curb.

This curb should be removed if the parking spaces are meant to be used. Leaving it as it is only further increases the students' anxiety in getting to a parking space in time it class in class. No one is going to try.

By Pamela Gracevold

Another Side To Lot One

In the last issue of the Norse Wind, as well as several other issues, we printed a letter complaining about the condition of Parking Lot One, located east of the Fine Arts Building.

The letter voiced a valid complaint that is shared by many students, including this editor. If the arbor ever needed a piece of food with rough gnats for task meeting ground. Lot One would be perfect.

There is another side to the story, however, and in the interest of fairness we ought to note it. According to Ferris Lessley, NED Engineer, every weekend that the maintenance department intended to grade the high-centered parking in the ground was either drunk or madly.

The weekends that it wasn't one of the other, it was too cold for the grade driver.

"The man who drives the grade is about eighty years old," Lessley pointed out, and if I told him to go out in the rain or cold he would tell me what to do with my job."

"We are getting to the time of year where it will be nice on the weekends, and we plan to grade Lot One," he added. We talked to Ferris Lessley last Thursday, and he said they were planning to move the grader over to the weekend. Needless to say, it turned out and they were unable to do anything.

It appears obvious that when ever is responsible for putting the parking on that muddy mound on the last of the remaining priority list either in a way that is beyond the problem we maneuver here, or is merely a major stockholder in a company that manufactures rubber boots.

As usual we are forced to live our chop-holes, our mud, and our degrading street Orthodontists, while the weather too memory's hands, and winter drags on.

Kerry's Corner

Kerry Thompson

Well, once again spring break is upon us, which I'm sure doesn't hurt anyone's feelings out in.

Some of you people will be all up in New York City and Washington D.C. taking in all the historic sites and, possibly, partying a little on the side. Don't, however, abuse your opportunity to witness the marvels of these two cities. How many people do you know that have taken a trip to New York and the nation's capital for only $397? Of course, never EEB is even hard to come by. And, while some are off on the trip, the rest of us will most likely revisit our hometown sửaes, of course, some get the urge to go to Fort Lauderdale, Fla. The parties will be constant and the books will all end up empty. I'm sure. But, while the parties are going on, please be careful so you can return to the good old NED campus on March 17.

Want to know how to tell if a party is good? See how many people are dancing on the tables.

"Did you see the guy who was dancing on the tables?" I asked the bar tender. "Tough enough to dip stuff?" "He was hanging on the bar stem to handle it," the bartender replied.

College kids expect a hit from a date. A girl and a boy were dancing on the tables and taking it way over the curb. The girl handed over to the book and said, "You might as well get it in my diary.""
With 13-12 Mark
Norse Conclude Conge Season

By Steve Boudreaux

The final 18 games of the season were a
necessity for the Norse, who needed to
close out the season strong to ensure a
Norse victory. The Norse finished the season
with a 13-12 record, their best season in
recent history.

Norse Basketball

The Norse faced off against several tough
teams throughout the season, including
the University of Kentucky, the University of
Louisville, and the University of Notre
Dame. Despite these challenges, the Norse
managed to pull off several impressive
upsets, including a win over the University
of Kentucky in the second round of the
NCAA Tournament.

The season ended with a loss to the
University of Notre Dame in the NCAA
Tournament, but the Norse可continued to
play with a sense of determination and
resilience throughout the season.

Intramural Briefs

The intramural season came to a close
with a series of exciting games and
competitions. The Norse Intramural
Association hosted a variety of sports and
activities, including basketball, soccer,
volleyball, and track and field.

The Norse women's basketball team
won the championship, while the Norse
men's soccer team took home the crown
in the track and field events.

The Norse Intramural Association
looked forward to another successful season
in the upcoming year, with plans to
expand their offerings and provide
opportunities for students of all
abilities.

Women Cagers End Play Of Second NICAA Year

Check Reeworker

Northwestern's lady Norse ended the
regular season with a 14-14 record in their
second season of intercollegiate play.

In the two-year span of existence of the
lady Norse, a total of 15 games were
played, with the team having a mixed
record of 12 losses and 3 wins. The team
finished the season with a victory over
their conference rivals.

The Norse faced several tough
competitors throughout the season, but
managed to secure a few surprising wins.

The Norse Intramural Association
looked forward to another successful
season in the upcoming year, with plans to
expand their offerings and provide
opportunities for students of all
abilities.

**FUU OFFICERS** — Elected officers for the spring semester of the Baptist Student Union at Northeastern are, from left: Arveti Jones, Oklahoma City; mission chairman; Linda Shafer, Westville, secretary-treasurer; Elyse Dale, Tulsa, devotional chairman; Randy Phelps, Jolita, advisor from the organization.

**Spring Semester NEO Golden Norse Band Members Named**

Robert Swansens, director of the Northeastern Oklahoma A&M College Golden Norse Band, has announced the names of forty-four second semester band members for the 1975-76 year.

Dr. Swansens main emphasis in band for the second semester is in respect to the concert band style of music. Swansens has been planning several high school, and civic organizational performances for the band after the semester is over.

**AFRO-AMERICAN SOCIETY Establishes New Title**

Afro-American Society has recently changed the organization name to the Black Student Union, according to Jane Talley, student senate representative for the group.

"One of the main reasons for our name change, and for adding more up-to-date and additional i s to our constitution and by-laws, in because we, the Black men and women at Northeastern A&M want to convey the message to people of all races on campus, throughout the community, and to across the nation that "We are somebody;" and that we are proud of our Black heritage and destiny," said Miss Talley.

The purpose of the organization is to promote further representation of the Black race through unity and identity. Miss Talley stressed that the group wants to be recognized as being Black instead of being either white or colored, Negro, and Afro-American.

"At the present time, and in the future, the Black students at the college who are involved with the organization, prefer to be identified as being a part and representing the Black Student Union," concluded Miss Talley.
