**Faculty Members**

Name Who's Who

BY ALVIN MOORENTHABER

Managing Editor

Members of the Northeastern A&M faculty have chosen 16 students to represent the college in the 1978-79 edition of Who's Who Among American College Men. Each student was chosen on the basis of his outstanding performance in school and his leadership in extracurricular activities.

The selection committee was headed by B. L. Mike, chairman of the faculty selection committee.

In order to be eligible for Who's Who, students must have completed at least one year of college and have maintained a minimum grade point average of 3.0.

The following students were selected:

- **John Adams**, political science
- **Thomas Baker**, mathematics
- **Robert Black**, biology
- **Louis Brown**, economics
- **Franklin Carter**, chemistry
- **David Davis**, physics
- **Robert Evans**, business administration
- **James Fitzgerald**, English
- **Robert Green**, psychology
- **William Harris**, accounting
- **Robert James**, history
- **Thomas King**, computer science
- **David Lee**, biology
- **Robert Mays**, mathematics
- **David Miller**, history
- **Thomas Nelson**, chemistry

**Talent Show Forms Due**

Applications are available to the dorms wanting to try out for the 1978 talent show, according to Ken Wilson, coordinator of counseling and guidance services.

The talent show is to be held in the college auditorium on the evening of February 26.

**Area Students Attend Art Day**

**For Instruction**

Approximately 200 high school students are expected to attend today's sixth annual Art Day at the University of Nebraska. The event will feature lectures, workshops, and exhibits on various art forms.

**Spring Break Trip Seats Open As Deadline Nears**

Students interested in going on the spring break trip to Washington D.C. and New York on March 19-21 should contact Dr. Boyd Converse.

A total of 45 seats are available. The cost is $18 per person, not including transportation.

Energy Costs Press NED

The entire NED college community is currently suffering from a mounting financial problem. Utility costs are up dramatically as compared to costs during the same period last year. The natural gas bill for the month of Jan. was $1,320,000 compared to $500,000 in Jan. of last year. This increase in cost can be directly attributed to the freeze and severe cold weather which has occurred this winter.

In addition to the increased costs, the university must find ways to control expenditures in these utility bills. Each of us here at NED must do whatever we can to reduce our consumption of energy. We must turn off lights when leaving a room, turn down thermostats to 65 degrees when no one is home, and conserve water.

If each individual sitting or working in the building has the will to take care of small matters, then the many utility bills can be controlled considerably.

Senator Denies Editorial

The last edition of your paper contained an article which I feel was in violation of good journalistic ethics and editorial standards. "The right to know the truth." Specifically, I am referring to the editorial about the student union that was published in the February 15th issue.

The union's right to the truth is not the only reason the student union member body should not be denied the opportunity to accept de facto action by the student union group. The information presented by the student union is not the only reason the student union member body should be informed of the full story.

The accomplishments of the union are an important factor in the student union. The student union is one of the most active organizations on the NED campus, and with the highest membership of any previous season. The student union is a major contributor to the success of the student union.

The president of the student union is the editor-in-chief of the student union newspaper. His role in the student union is to represent the student union member body. The student union member body is the only group that can be held accountable for the student union's actions.

Internationals Need Help

The 110 foreign students at NED are in need of your help and friendship. Each week a new group of foreign students arrives at the University and they are the only people who can be held accountable for the student union's actions.

One of the major problems that all foreign students face is the lack of information on the campus. Many foreign students do not have a grasp of the American language. They must learn to communicate in their native language. The only way to achieve fluency in the American language is to speak it.

Therapist Earns Degree

The sixth psychology examination for licensed physical therapists was administered by the National Physical Therapy Association on Friday, April 8, 1983. The examination is sponsored by the U.S. Public Health Service.

Deadline for submission of applications to the Health Services Research Institute, Arkansas State Department of Health, 3 Milk and 17th Streets NW, Washington, D.C.

The examination is designed to qualify licensed physical therapists for their profession. The examination is administered by the National Physical Therapy Association. Therapists are required to meet the requirements of the American Physical Therapy Association and the National Physical Therapy Association to be eligible to take the examination.

The examination consists of two sections, the first to be administered in a morning session and the second in an afternoon session on April 8. The examination is to be taken by all physical therapists.

Inquiries concerning administration of the examination and examination procedures should be directed to A.J. Baker, Director of the Physical Therapy Education Program, Arkansas State Department of Health, Health Care Services, Little Rock, AR 72201.
Coeds Find Welding Fun

Judy Hassell was a small, outgoing girl, who never seemed to hurt anybody. Judy had a light, breezy personality. Always willing to listen to other people's problems, she had more friends than anyone else in the room.

Judy was going to the Welding Department at NEO. She was the only one in the welding class who was an electrical engineer and she had a lot of experience in that field.

One day, while she was working on a project, she noticed that the welder was having trouble with his equipment. She went over and helped him, and the two of them started talking about welding.

Judy was very impressed with what she saw, and she asked the professor if she could try out the welding class. He agreed, and she started attending the class.

Judy was soon one of the top students in the class, and she was very proud of herself. She had found her true passion in life, and she was determined to become a successful welder.

Judy's hard work paid off, and she was soon offered a job at a local welding company. She accepted the job, and she started working there full-time.

Judy was very happy with her new job, and she was determined to make a success of it. She worked hard, and she was soon recognized as one of the top welders in the company.

Judy's success only continued to grow, and she was soon offered a job at a higher-paying welding company. She accepted, and she started working there.

Judy was very happy with her new job, and she knew that she had found her true calling in life. She was determined to make a success of it, and she was confident that she would be successful.

Gridders Start Spring Practice

After a week of snags that came with conditioning, the_golden_Nebraskas begin a new season of football practice in shoulder pads and helmets under new head coach Lou Steider.

"We are back in the usual weekly routines," says Lou Steider, "We are back in the swing of things, and we are ready to begin practicing for the first time." Steider is optimistic about the team's potential and the direction of the program.

Total Participation: Nebraska A&M's new head football coach Lou Steider puts a portion of the 60-man squad into shoulder pads and helmets on Monday. Pre-season practices will start for four weeks in shoulder pads and helmets before the annual spring game.

Norse Play Vital Bi-State Contests

BY CHRIS FLETCHER
Sports Editor

Closing out regular season play, the Golden Norsemen will face off against Creighton in the season finale.

The Norse have the opportunity to make a statement in the region. A win will solidify their place in the region's top four and a potential spot in the state tournament.

Norseman Matten Begin Action in Region II

By DON COCHRAN
Associated Sports Editor

Three members of Northeast A&M's tennis team will participate in the Region II Tournament which will be held in Kansas City on Feb. 23-25.

After capturing nine dual matches, the Norse won a 2-7 meet against the Bluejackets on Monday. The Norse won 8-3 against the Bluejackets on Monday. The Norse won 8-3 against the Bluejackets on Monday. The Norse won 8-3 against the Bluejackets on Monday.

The Norse will face off against Creighton on Friday night at home. A win will solidify their place in the region's top four and a potential spot in the state tournament.

Defending National Champions Seed T nhất In Regionals

Defending national champions Kent State will enter the first round of the Region II Tournament Monday at Keenman Center.

The Golden Norsemen will be seeded as the number one seed in the region. The Norse have a strong lineup and are expected to make a strong run at the title.

Organizations

Sigama Delta Theta Tours B.F. Goodrich

The Student Organization Reflections from a Star above...the Editors, or perhaps more accurately, the editors, have been quietly waiting for an opportunity to reflect on the events of the past couple of months. The following is a brief summary of the highlights of our organization's activities during this period.

Members of Sigma Delta Theta recently visited B.F. Goodrich in the nearby town of Appleton. The visit was arranged in order to provide our members with an opportunity to gain a better understanding of the company's operations and to explore career opportunities within the organization.

During the visit, our members were given a tour of the facility, including the research and development laboratories, manufacturing plants, and corporate offices. We were also able to talk with current employees about their experiences and career paths within the company.

In addition to the tour, we were given a detailed presentation on the company's history, mission, and future plans. We had the opportunity to ask questions and engage in discussions with the presenters, who provided valuable insights into the industry and the company's vision for the future.

Our visit to B.F. Goodrich was an enriching experience that has inspired our members to pursue careers in the chemical industry. We are grateful for the opportunity to learn from such an esteemed organization and look forward to future collaborations.
