### Spring fashions Tuition increase possible

**abandoned in shows**

"Spring Fashions Round the Clock" is the theme for two Miami Mall fashions shows sponsored by the Northeastern A&M community.

The shows are scheduled to begin at 1 p.m. and 7 p.m. on Saturday.

Both shows will occur within the mall and will feature models from South Florida and surrounding areas.

Members of the college fashion sales promotion class helped prepare the shows. The class handled publicity, scenery, programs and overall show arrangements.

- **Designers:** Delores W. Brown, Lisa M. Rhodes, and Linda Phillips

- **Models:** Laverne Jones, Akie M. Lee, and Lisa Rhodes

- **Stage and Lighting:** Robert A. Wilson

- **Music:** Provided by the college's band

### Candidates visit forum

Students will have the chance to represent their favorite presidential candidate in the rhetoric hall located in the old gym on Monday, Feb. 29th from 7 p.m.

This is an opportunity to discuss issues and focus on every possible future leader in our presidential race," said Dan Frosh, director of the Norse Campus Ministries.

The forum will begin with a 5-minute speech from each candidate's representative.

Students who wish to participate in the discussion are encouraged to register their interest in the forum.

"The whole event is oriented toward the students and giving them the opportunity to share public opinions," Frosh said.

The NCM will be an unbiased moderator of the session. Smith also said the forum is an opportunity for students to learn about the candidates and their platforms.

### Mid-term courses added to schedule

Several mid-term courses in mathematics and business are offered after spring break on March 14.

These courses are available for students who need to register for them. The course offerings are listed on the college's website and can be accessed by students who need to register for them. The courses will be offered after spring break on March 14.

**For more information:**
- **Department:** Mathematics
- **Location:** Room 101
- **Contact:** Dr. William Koch

### Financial aid

A new financial aid program has been established for students at the college. The program offers grants and loans to students based on need.

- **Grants:** Available to students based on need
- **Loans:** Available to students who need to borrow money

### RACE CARS

Several area high school students observe the variety of cars displayed at the spring race held last Wednesday in the old gym. The cars on display included a variety of classic and modern models, all of which were driven by students who had spent hours preparing them for the event.

Active Life

For Success

Keeping busy is typical for a college student, so for Curtis Adams it is no different.

"I am majoring in accounting because I enjoy working with numbers," says Adams.

Because he enjoys his major, Adams made good grades and applied for Who's Who Among American Junior College Students.

"I was selected for Who's Who and felt good about it. I was shocked when I found out I was accepted, and I felt very honored to be chosen as a member of such a elite group," says Adams.

Recipients of the honor were selected by a faculty committee which viewed academic achievements, citizenship and participation in activities on campus.

Adams has a 3.9 grade point average from last semester and is involved in several groups on campus.

He is a member of Phi Theta Kappa, student senate and the Baptist Student Union. He is a treasurer of Phi Beta Lambda and is on the student senate representative for Colleges for Christ last year.

Adams also competes and qualified for competition in the National Skills Tournament of the Phi Beta Lambda International Plains regional convention last semester.

Recently, Adams was chosen as a state delegate to the state convention for the Phi Beta Lambda organization.

"I usually have two meetings a week in the groups I am in. But I think it is fun to be involved in the groups," says Adams.

Practically all of my friends hang out at the 88's, and I really like it there.

Adams is carrying classes this semester and works 10 hours a week in the library on work-study. "I am a member of Oklahoma State University and work in the college library," he says.

I would like to go into business school next year, work in the accounting field.

"I would like to work for a new company that recently has started," says Adams.

I have one brother who is 21 and is going to go to OSU with him. I could go to school there. But, I didn't decide against that and came here. I really like it here," says Adams.

Instructor stresses importance of education

By Carolyn Ahrens

"My husband believes education is the most important thing anyone can do no matter how much a career does.

Dr. Bugrose, a member of the English department.

Dr. Harrison is an English teacher who never wants to do anything else with his life except teach.

He says, "I always wanted to be a teacher since the first grade.

"The selection for being a teacher is actually a matter of poor health. Although he is in high school, he continues to do well in English class.

Dr. Harrison has studied in India for eight weeks and also studied in East and West Berlin for one week.

There were opportunities that I had that the average tourist does not have to have the chance to do.

The teachers in Poland were great because they were embarrassed about what old young people and in all things that they were lacking, so people," says Dr. Harrison.

He is now in high school and is a member of the English department.

Dr. Harrison received her Bachelor of Science and Master of Arts in education at Ball State University in Muncie, Ind. In Education, a major in Spanish, she is a graduate of the Department of Education at the University of Illinois, Champaign-Urbana.

Also, he is a fellow of the English department at the University of Illinois, Chicago.

"I am an English teacher and I do enjoy what I do, but I want to teach more," says Dr. Harrison.

Dr. Harrison was married in 1981 and has four children. He is a graduate of the University of Illinois, Chicago.

Mathematics instructors will be speaking in six enrichment lectures on college algebra through the months of March and April.

The lecture series will be presented Wednesday, March 5, in Cunningham Hall 110.

These lectures are for junior and senior students and are open to all students on campus.

Librarian enjoys working in periodical department

By Billie Johnson

Billie Johnson, the head of the periodical department in the Learning Resource Center, has been at the college for 30 years and enjoys NER very much.

"I like seeing students grow in maturity as they come to another.

Sharing and assisting a student is nice watching them grow," says Johnson.

Prior to her job, Johnson worked part-time in the operation of the Library, in charge of only one microfilm machine and one microcomputer.

Now there are six microfilm machines, the periodicals have expanded into two rooms and there are several types of computers and typewriters for students to use.

"This is the place to start if the students really want to know something.

We are open from 8:00 a.m. to 9:00 p.m. and students can come in any time they wish. We are open during the day and at other times.

We have a good time helping students find what they need and we try to make it easy for them to find what they need. We try to help students find what they need and we try to make it easy for them to find what they need."
SHARING MATERIALS
These students are sharing material they obtained during a visit to the State Capitol in Oklahoma City for International Student Awareness Day. Making the trip are Umar Ahmed, Ahmed Obaid, Mark Woonmoosob, Lasso; Kai Nakano, Japan; Rosemary Guiron, Philippines, and counselor Jane Thompson.

‘Emperor’ wins most nominations

“The Last Emperor,” the tragic saga of China’s boy emperor, captured top honors with nine nominations last Wednesday for the 58th Motion Picture Academy Awards. It was followed by seven nominations for “Broadcast News,” the romantic comedy of life in a network news bureau. Following those two films, with six nominations each were: “Empire of the Sun,” the Japanese invasion of China as seen through a boy’s eyes; “Paul’s Vacation,” the life of a retired movie star; and “Moonstruck,” the comedy of love in a volatile Italian-American family.

All four except Steven Spielberg’s “Empire of the Sun,” were nominated as best picture. The fifth nominee was John Boorman’s “Hope and Glory.”

Two-time winner Jack Nicholson won his sixth nomination as the 1970s bum in “Frisbee,” and Robin Williams was nominated for best actor with his role as the street kid in “Snoopy.”

Another double Oscar winner was Meryl Streep for her seventh nomination for “Frisbee.”

In the best actress race, Cher, for “Moonstruck,” Glenn Close, “Paul’s Vacation,” Holly Hunter, "Broadcast News,” and Sally Kirkland for “Souls” were nominated.

All are first-time nominees except Gardenia, named for “Young Girl” in “You’re a Big Girl Now,” in 1979.

The nominees for best direction were Adrian Lyne for “Frisbee,” John Boorman, for “Moonstruck,” Brian De Palma for “Dreaming,” and Barry Levinson for “Frisbee.”

Another surprise omission was James L. Brooks for his direction of the box-office smash, “Broadcast News.”

GREGG EMERSON

in the United States of America the life story of the rich men and the power is based on transportation.

Almost everyone in the country rides in or drives some kind of automobile every day.

Well, the car I drive in high school is a something kind of a car.

Some of my friends refer to it as a trash can on wheels, the tank, the dirt mobile, the thing and of course, sometimes, a car.

My dad had curb caked on the outside of the body from end to end.

One reason for this dirt on the car was that I never washed it! Second reason, I lived on a dirt road.

Now in the inside of the car, which resembled a trash can.

Papers, books, cans, bottles, wrappers and everything else that was put on the floor and on the seats of the trash can on wheels.

I was the only thing that helped keep the car clean in the inside was the hole in the floorboard of the car seat.

Yes, it was a hole about the size of a basketball in the floorboard. Well, it did come in handy on a few occasions when I needed to have a cat or bottles out on the weekends.

Well, there were some good things about this “trash can on wheels.” I never had to drive it on dates. I never had to be very clean in it if I was with a bunch of friends. Of course, I did care what happened to it. And I never had to lock the doors.

If somebody wanted to steal something out of the car let them.

Believe it or not the heater did work on the car, sometimes in the winter.

It had air conditioning in the summer.

My parents did make me clean the car once. I took three days and I was only half through when they said I couldn’t do it any more.

When I bought the “trash can on wheels” it did resemble a car.

But after a few weeks of abuse, trash, and filth did not look anything like a car.

Well, my parents told me before they would buy me a new car. I had to clean my bathroom.

My bedroom is also referred to as the trash can in the house.

For the moment I am riding in a car pool every where, or the trash can in the house.

So when you use your car to buy a car, make sure you are not buying “the trash can on wheels.”

Yearbooks are coming April 25 Buy One!
