Impact Brass hold concert at church

Impact Brass & Singers, a contemporary gospel group, will be performing its concert on Saturday and Sunday at the First Christian Church in Miami. The concert is being sponsored by Collegiates for Christ and the First Christian Church located at 130 N. Northeast.

In the past years, the group has presented more than 2,000 concerts across America, Canada, Jamaica, and Mexico. Impact Brass is a non-profit, multi-media presentation.

The goal is to reach out to people through music and the visual arts, breaking down barriers to the heavens and helping others to experience God in a personal way.

Impact Brass performs on Thursday from 7:30 to 9:00 p.m. at the First Christian Church, 130 N. Northeast, Miami. The concert is free and open to the public.

Program offers three classes

Students are offered the opportunity to enroll in three classes this fall: English Composition II, English Composition III, and a workshop on creative writing. These courses are open to students of all levels and are taught by experienced faculty members.

Drug awareness becomes issue

Drugs are a major problem in today's society. People are faced with this menacing problem in their everyday lives, be it at school or at work. Although the age group of under twenty has the highest drug problem of everyday use, teenagers have the highest rate of having used drugs.

Drug abuse does not only effect only teenagers and young adults, it effects people of all ages. All too often, the drug abuser has a under lying problem that they feel that drugs will either cure or make disappear for a while. It is a sad truth that a person would feel so bad about their life that they would ruin it by getting hooked on drugs.

Group studies heritage

By Heidi Wilkins

NEO's Native American Students Association (NASA) wants to become known as the school organization that helped to bring culture to the NEO campus. NASA just wants to make students notice the different activities they present and understand that they are very proud of their indigenous heritage.

NASA is a mixture of NEO students that are interested in and want to learn more about the heritage and culture of the American Indians. Students should no longer have the idea that to be a member of NASA they must be of indigenous origin and descent. All that is required is that a person have a genuine interest in the heritage and culture of the native Americans. NASA wants to become more active in school sponsored events and they started out the year right by winning first place with their traditional art display on Parents' Day.

Their costumes were represented with a tapa, a bread and incense. The energy and emotions present traditional customs and ceremonial rates of their tribes.

A Spring Pow wow is also being planned to help celebrate the old traditions.

In the near future, NASA will be preparing to host actor Rodney Grant who will be presenting a character named "Wind in his Hair" for the upcoming motion picture "Dance With Wolves." He will be speaking to the NASA members about how his role in the movie depicted real life indigenous cultures. Grant is currently in constant communication with NASA's program and is very supportive of the NASA club.

Next week, Grant will be flown to the Smithsonian Institute in Washington D.C. for the premier of the new movie. While he is there, he will be meeting with various indigenous artificers to the archives division of the institute and will be involved in the NEO College Heritage Program. Recently, add-to NASA plans of activities has been "Indians in Oklahoma Awareness Week." Last week, NASA received a letter from the government's office: the letter stated that Governor Henry Bellmon has signed a bill designating Oct. 21-27 as a week in which all Oklahomans should recognize their ancestral heritage and be proud.

Plans are already being made for various ways to celebrate this special week. One idea, which is still in the beginning stages, is the possibility of a parade. Other activities that the NASA organization is currently planning are an upcoming monthly newspaper. This newspaper will be filled with historical and current indigenous legends and as the latest news as to how many of the activities NASA participates in are still under way, new members are always welcomed.

Members need not be of indigenous descent, they just need a genuine interest in the indigenous customs.

Harvey Class says
Midwest primed for earthquake

Although the scientific community hasn't endorsed Brown's method of projecting earthquakes, his track record is getting a lot of attention. Using a theory based on tidal waves, Browning has made seven accurate earthquake predictions.

Earthquakes are ranked by the Richter scale and the Mercalli scale. The Richter scale measures force or strength, and the Mercalli scale measures the intensity, or how much an earthquake felt in a particular area. A "major" earthquake can register a 7 or higher on the Richter scale.

The Center for Earthquake Studies (CCE) at Southeast Missouri State University in Cape Girardeau monitors 300 seismograph stations. It relies on data from a network of 160 seismograph stations across the state. The seismic data is analyzed and evaluated daily and is sent to the National Earthquake Information Center in Washington, D.C.

CCE Director Howard Pickens says a new program to monitor seismic activity in the state is expected to begin shortly.

"I'm looking forward to it," Pickens said. "It will be a valuable tool for understanding the behavior of earthquakes in the region."

CCE has been tracking seismic activity in the state since 1973. It has recorded more than 500 earthquakes since then, with the most recent one occurring in 1990.

According to Pickens, the next major earthquake in the state is likely to occur in the next 30 years. However, he says it's impossible to predict the exact time or location of the next major earthquake.

"We don't know exactly when the next one will hit," Pickens said. "But we do know that it will happen. We just don't know when."
Top ranking on the line in Tulsa

By Todd Nickels

One of the most intense rivalries in the annals of intercollegiate football occurs annually in Tulsa as the Golden Hurricane take on Coffeyville (Kan.) Community College.

Kickeff's turf is set for 2 p.m. at Union High School Stadium.

Heading into the Border Battle, the Red Ravens are 7-4 and rank number one in the nation in the U.S. coaches' poll. The Golden Hurricane, on the other hand, are 9-2 and number three in the country.

Last year marked the first time since 1967 that the two teams played each other in the state of Oklahoma.

"Before last year's game, the coaches and players of both teams were excited to play each other," said Golden Hurricane head coach Glenn Howard. "Even though the game's importance to the players, it was the first time in years that the two teams had met in Oklahoma."}

scored six touchdowns. Junior Johnson, a running back, had the lead in rushing with 134 yards and one touchdown. Colorado (541) had a total of 295 yards rushing.

On the offensive line for the Golden Hurricanes, tackles Greg O'Neal (4-2, 250) and Jeff King (4-1, 250) are key players. Guard John Ritter (4-0, 250) and left tackle Robby Carr (4-2, 260) are strong, consistent players.

Joe Morgan (5-4, 250) is a key player on the defensive line.

The matchup is set for Tulsa's 100th win, which would put the program on the cusp of national recognition. The Golden Hurricanes have been in the top 10 in the U.S. coaches' poll for the past 10 years.

Looking ahead, the team will face off against rival Oklahoma State University in the annual Bedlam game.

Golden Norsemen ambush Rangers

By Clark Sherman

Trailing at halftime, the Norse exploded for 17 third quarter points to overcome Kilgore, Texas 33-14 last Saturday at Robertson Field.

Playing before the smallest crowd of the season at 1,300, the second ranked Golden Norsemen closed out the home portion of their schedule.

The win improved the Golden Norse record to 7-1 overall. The Rangers fell to 5-2 on the season.

Against Kilgore, neither team could get untracked during the first quarter. The Golden Norse were unable to take advantage of a southerly wind gusting 25 miles per hour.

Going into the stiff breeze on their first possession of the second quarter the Norse marched 81 yards on 15 plays for the first score of the game.

Freshman tailback Jerry Jermon caught a 38-yard pass from Scott Crabtree for the touchdown. Mike Dawson's extra point made the score 7-0.

Kilgore answered with a 69-yard drive to tie the game. Sophomore tailback Joe Mussallem started an 11-yard pass for the touchdown.

Following a Kigore drive, the Rangers covered 51 yards in seven plays to take the lead. The first half ended 14-7, Kilgore.

"You can't lay back and wait for things to happen against a team as good as Kilgore," said Norse coach Glenn Wolfe.

"That's what I told them at the half. We're going to make things happen and we did in the second half," Wolfe added.

After shutting down Kilgore on their first possession of the second half, the Norsemen went 57 yards in five plays to tie the game.

Freshman tailback Lamar Smith galloped 40 yards down the sideline for the score. Dawson's PAT made the score 14-14.

Sophomore linebacker Chad Brown pounced on a fumble by Mussallem to give NED another first down. Dawson capped off the 15-yard drive with a 22-yard field goal to give the Norse a 17-14 lead with 7:42 left in the third.

A 50-yard pass by Crabtree to Billy Williams set up the Golden Norse's next score. Crabtree hit Williams over the middle for a 10-yard touchdown pass.

Dawson booted the extra point, giving the Norsemen a 24-14 lead with just over a minute left in the third quarter.

Senior linebacker Tyrone Car-

rington intercepted a pass to set up the final Norse touchdown.

A diving catch by sophomore wide receiver Chris Person set up Chad Brown's 80-yard run for the final Norse points.

"Eric Young scored the final touchdown with a one yard run. Dawson added the extra point.

Smith led all rushers with 180 yards on 30 carries. Veteran Tyrone Rogers rushed three times for 39 yards as the Norsemen made 49 times for 220 yards on the ground.

Mussallem paced the Ranger ground game with 177 yards on 26 carries. Quarterback Terrence Lewis added 32 yards on six attempts. Kilgore was able to manage only 125 yards rushing on 48 attempts.

Crabtree completed 11 of 16 passes for 176 yards and two touchdowns with no interceptions. Wendell Lowery was 3 of 11 for 59 yards.

Williams led the Norse receiving corps with four catches for 55 yards and Penn made two receptions for 25 yards.

Free safety Greg Tumble led the Golden Norse defensive effort with eight unassisted tackles, three assists and one interception.

Lintchukers Corrigan and Tim Selick each recorded six solo tackles and eight assists while defensive end Chad Brown made six solo, four assists and one unassisted recovery.

Keny Henderson completed 6 of 12 passes for 93 yards with two interceptions for the Rangers. Ter-

main Lewis completed 5 of 11 passes for 69 yards with one interception.

Smith led the Norse receiving corps with two catches for 57 yards.
