Address: _____

Please select your choice of course delivery:

___ **Distance Student:** Online course delivery / Labs – two days on campus at the beginning of the semester, two days mid-semester, two days end semester + virtual lab work throughout

___ **Campus Student:** Online course delivery / Labs four days a week on campus

If you are currently working in a clinical laboratory please report it here:

Due By March 1st of each year. Late submissions will be considered at the director's discretion.

MEDICAL LABORATORY TECHNICIAN PROGRAM NON-ACADEMIC TECHNICAL STANDARDS

The following guidelines may be useful in helping the student to determine his/her potential for success in the clinical laboratory setting.

The clinical laboratory environment requires the employee to have a reasonable mobility and to lift weighted items. In addition, his/her coordination needs to be such so as to allow for fine manipulations and movements. Physical handicaps such as loss of motor skills that are compensated by braces, hearing loss, deafness with absence of understandable speech, total deafness, speech defects, cardiac disorders, abnormally short in stature persons, or individuals on crutches or in wheelchairs are capable of working the clinical laboratory.

Because laboratory work requires good visual acuity and color discrimination, students with severe color perception defects or partial vision defects which cannot be corrected with glasses or contact lens will find laboratory work very difficult, if not impossible. Students with correctable visual defects have in many instances been able to compensate for this problem and work successfully in the laboratory.

Students who are interested in the laboratory profession need to be emotionally, mentally, and physically capable of coping with the eight-hour day, handle work-place relationships, accept supervisory direction and the stress that is a part of the learning environment.

It is strongly recommended that those individuals with physical handicaps should visit a clinical laboratory and shadow a working technologist through activities of the laboratory, then the prospective student can accurately evaluate his/her potential and capabilities for a career in the clinical laboratory. Contact the program office for assistance in making such arrangements.

Northeastern Oklahoma A&M College maintains an office for assisting disabled students. Carla Murphy has been designated as the college's Coordinator of Services to the Disabled. As such, she is the College's compliance coordinator for section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act. In this capacity, Ms. Butler arranges for academic adjustments and auxiliary aids to be provided to qualified students and coordinates work-place accommodations. She is also the individual to whom concerns about physical access to facilities should be addressed. Carla's office is located in Shipley Hall, room 309. The telephone number is 918-540-6969.
